

## EFTPOST & CASH REGISTER SEALZ

Whether your point of sale is a wet bar area or dry retail outlet Custom Sealz are available for a large variety of cash registers to protect against spills or dirt and grime.

## CONSTANT PROTECTION COVERZ

Freedom and Protection at last! Now your monitor, fax, cash register or industrial monitor can be operated in harsh environments while being protected 24 x 7. Made of Dureflex® Polyether TPU Film: the ultrastrong, ultraclear material that has revolutionised equipment protection.

### Why we get it right!

Through our precision molding process, each key is formed for an exact fit. Even between keys the material maintains the highest quality and thickness providing superior protection for the full life span of the cover. Smooth channels allow for quick and easy cleanup after spills. Aids in infection control, and H1N1 prevention practices.

On average, Custom Sealz & Covers last twice as long as the competition.

Custom Sealz, Skinz & Constant Coverz can be manufactured to suit any push button device. However we may need your device to ensure an accurate and precise fit.

Call Custom International and speak to Matt and our Sealz Team for more information. Please ensure the make and model number of the unit is supplied.

# CUSTOM SEALZ AND COVERZ

**CUSTOM**  
INNOVATING YOUR WORLD

## PROTECTIVE COVERS FOR ALL YOUR ELECTRONIC EQUIPMENT

## ABOUT US.

Custom International is the only company in Australia to specialise in custom designed and manufactured push button Sealz, Skinz & Constant Coverz.

Manufactured in Australia using Duraflex® Polyether TPU Film, these precision moulded Sealz & Constant Coverz fit snugly like a second skin with perfect finger feel, ensuring invisible 24x7 protection against moisture, spills, chemicals, dust & germs in any harsh operating environments. SAVING downtime.....and MONEY!!

Protection Sealz can be manufactured for **ANY PUSH BUTTON DEVICE.**

Protecting your keyboards, notebooks, telephones, POS equipment, vehicle communications equipment, industrial keypads/controllers, marine and medical equipment.

## PREPARE. PREVENT. PROTECT.

Custom International Sealz & Covers provide front line protection for your computer equipment. You will never have to worry about spilling coffee, getting moisture in your equipment, stains and grime between the buttons or any other typical hazards happening to your equipment.

## A Safer Way Forward.

## Aid in Infection Control

No Need to remove cover for disinfecting. Wipe down in seconds. Easy to clean with quick germicidal wipes. All keyboard covers and screen protectors are 100% latex free. Prevents bacteria from growing between and under keys and crevices. Keeps it on top where it can be cleaned and killed easily.

## WORKSTATION SEALZ

Protect your keyboards and mice from dust, spill, paper clips and staples with our precision moulded custom designed sealz.

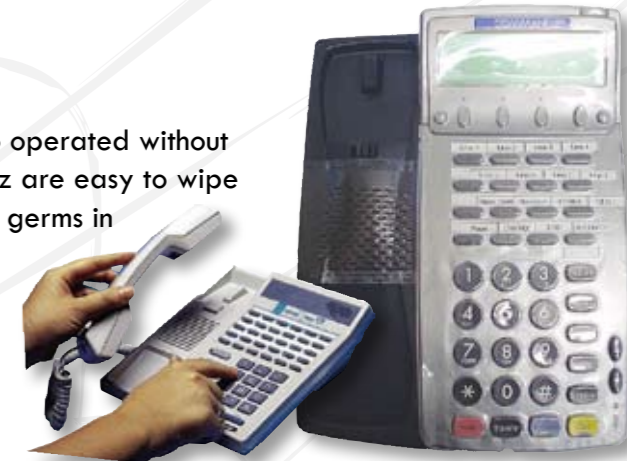

## NOTEBOOK/PALMTOP SEALZ & SKINZ

Protect your valuable notebooks and palmtops from the elements, reduce faults and damage with our custom range of Sealz & Skinz. Custom Sealz are moulded to fit perfectly over the keypad & touchpad area for full finger typing feel while Skinz provide a Duraflex® barrier over the keypad. Both Sealz & Skinz provide protection against spills, dirt and equipment damage (available for a wide range of models – please specify your make and model with your inquiry).

## TELEPHONE SEALZ

Allows all kinds of telephones & office communications devices to operated without interference while providing protection from dust & liquids. Sealz are easy to wipe clean providing a hygienic barrier to help prevent the spread of germs in your office.

## INDUSTRIAL DEVICES & CONTROL PANELS SEALZ

Custom Sealz can be made to fit your vital vehicle comms control heads & microphones to prevent faults from dust or grease and water damage during cab spray outs. Sealz are custom made to precisely mould and fit over ANY industrial keypad or controller giving 24 x 7 protection in the harshest operating environments.
